

Waste & Recycling Container Option Chart

YOUR WASTE, YOUR CHOICE

We offer three different sizes for waste, each with a different fee. You have two options for the recycling containers and they have no fees attached. You can view them on display at the municipal office. You need to select the size that will fulfill your regular needs with some room for occasional variations. By default, you will receive a small waste bin and a large recycling bin.

SMALL BIN
Capacity: 35 Gallons (120 litres)
Bag Equivalent: Up to 2 Bags
Dimensions: 39" x 20" x 23"
Maximum Weight: 120 lbs
Waste Fee: \$100 per year

RECYCLING BINS HAVE NO FEE

MEDIUM BIN
Capacity: 65 Gallons (240 litres)
Bag Equivalent: Up to 4 Bags
Dimensions: 41" x 27" x 28"
Maximum Weight: 220 lbs
Waste Fee: \$185 per year

LARGE BIN
Capacity: 95 Gallons (360 litres)
Bag Equivalent: Up to 6 Bags
Dimensions: 45" x 29" x 34"
Maximum Weight: 320 lbs
Waste Fee: \$270 per year

Container design and dimensions are approximate and subject to change without notice.

What will Change? What do I have to do?

NEW AUTOMATED COLLECTION SERVICE

The council for the Township of Perth East, has accepted a proposal from the Bluewater Recycling Association that will upgrade the current waste and recycling program to a new automated collection service scheduled to begin the week of June 5.

Rolling wheelie bins relieve residents of moving heavy cans and bags, keep animals out, and are supplied by the Association. While providing a cleaner community with less litter, the wheelie bin system also improves efficiency and protects workers from injury and the potential of handling dangerous materials. You will no longer need to buy garbage bags or replacement blue boxes.

Each home will be provided with a small wheelie bin for waste and a large one for recyclables. It will enable this enhanced, cleaner, and more efficient service to begin. All residential customers are required to use the new bin system to participate in the municipal collection program. Individuals generating few recyclables may request the medium bin for recycling.

You can request one of the two larger bins for waste, if needed. The medium bin holds up to four bags of waste. It is suitable for those generating up to three normal waste bags per collection with the occasional extra bag providing some flexibility. Our large bin is our largest container issued for large waste generators. It is the perfect size for businesses and small apartment buildings who produce up to 6 bags of garbage per collection, or for those who wish to put out their materials less frequently.

The waste and recycling collection frequency will change to biweekly and the collection day may change. Service will be upgraded to both sides of the street in urban areas, where possible.

Users will pay an annual fee for collection services billed through the tax bill based on the size of container used for waste.

No more bag tags will be needed on collection day. Any extra tags can be refunded at the municipal office from June 5 until December 31, 2017. There is still no fee for recycling.
